

Stappenplan : Vouw een straaljager.

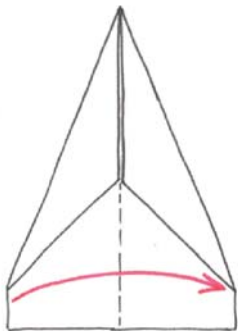

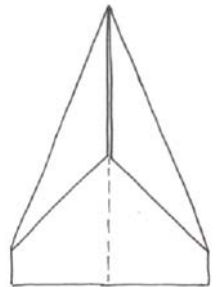

Neem een A4-blad en vouw de lange zijden op elkaar. Vouw het blad terug open en leg het blad papier voor je met een korte zijde naar je toe.

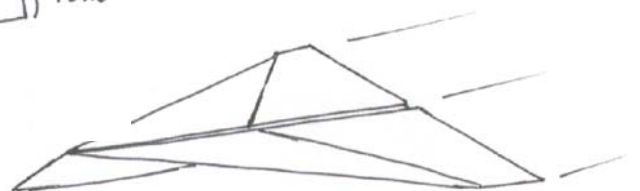

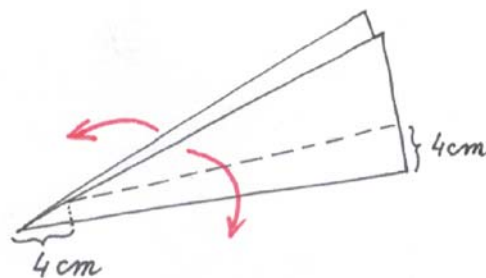

Plooi de bovenhoeken links en rechts naar het midden toe. Druk de plooi stevig aan met duim en wijsvinger. Je hebt nu een vijfhoek.

Vouw de hoeken die zo ontstaan zijn weer tot in het midden, zodat je deze vorm krijgt.

Vouw de vlieger dan dubbel en teken deze vouwlijn. Vouw de vleugels open op de vouwlijn en je vlieger is klaar !
